Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: page 11, line 14, it appears that the numeral "62", after the phrase "chopper blade", should be replaced with the numeral --82--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112, 2nd Paragraph

Claims 2, 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is vague and indefinite. On line 2, the phrase "the bedroll being capable of rotating" is unclear. Does the bedroll rotate or not? If so, it should be positively set forth in the claim.

Claim 12 is vague and indefinite. On line 7, the phrase "an assembly capable of severing a web" is unclear. Does the assembly sever the web or not? If so, it should be positively set forth in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3654

Claims 1-9, 12-17, 20 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Ba Dour, Jr. et al (U.S. Patent No. 6,179,241).

With respect to Claims 1-9, 12-17, 20 and 25, Ba Dour, Jr. et al, Figures 1-8, teach a device for severing and carrying a web in a web winding operation, comprising:

a first and second blade, the blades operably connected and spaced apart a predetermined distance to form a gap, the gap is sized to receive a severing mechanism; and a unitary elongated mandrel connected to at least the first blade comprising a plurality of spaced pins.

With respect to Claim 25, the method described in these claims would inherently result from the use of device of Ba Dour, Jr. et al as advanced above.

Claims 1-9, 12-17, 20 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Nystrand et al (U.S. Patent No. Re. 28,353).

Claims 1-9, 12-17, 20 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Andersson (U.S. Patent No. 3,505,150).

Claims 1-9, 12-17, 20 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Heuff et al (U.S. Patent No. 3,567,552).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10, 11, 18, 19, and 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ba Dour, Jr. et al as applied to claims 1-9, 12-17, 20 and 25 above.

Art Unit: 3654

With respect to Claims 10, 11, 18, and 19, Ba Dour, Jr. et al do not mention the spacing of the blades. However, it would have been an obvious matter of design choice, as determined through routine experimentation and optimization, to dimension the distance of the blades of Ba Dour, Jr. et al as specified in Claims 10, 11, 18, and 19, line 2 because one of ordinary skill would have been expected to have routinely experimented to determine the optimum dimensions for a particular use.

With respect to Claims 21, 22, 23, and 24, Ba Dour, Jr. et al do not mention the number of pins used. However, it would have been an obvious matter of design choice to provide Ba Dour, Jr. et al with the necessary of pins as specified in Claims 21, 22, 23, and 24, line 2 because one of ordinary skill would have been expected to have routinely experimented to determine the optimum dimensions for a particular use.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
